Arrest of a Comrade.

the Policeman a Sneak.

Conrad Fatzer, seventy-two years old

Shortly after 8 o clock last night Fatzer,

Their trials were temporarily suspended.

The trial of Capt. Adam A. Cross and his ex-ward man. George Smith, was resumed temporarily, and Miss Thornton testified that the house ran openly from the time she bacame an inmate. Dec. 2. 1892, down to Feb. 23, 1893, when Capt. Cross was transferred and Capt. Pevery took command.

Charles A. Hess cross-examined. The girl, who is really an attractive, shrinking little creature, told him that she was fing little creature, told him that she was twenty-two years old, and that her right name was Annie Russell.

"I am married now, and live with my husband at 32 Bayard street," said the witness.

"I vork at passementerie making. My husband is sick."

"I vork at passementerie making. When I began to speak Burns came into the room."

Commissioner Sheehan, with Inspector McLaughlin still wrankling in his bosom, asked questions, and Kilpatrick said he down the Captain. He pointed to a man behind the desk. I talked to him, but I do not know that it was McLaughlin. I have never seen him to know him."

Gen. Kerwin asked: "Mr. Kilpatrick, who have been good backmailed?"

Kilpatrick slid forward eagerly in his arm-chair, and, poking his spectacles at Gen. Kerwin, repided: "I—don't—think—I could—name—two—haven't."

Well. I'm no, really married, just

where you were married, said and Hess.
"Well, I'm no. really married, just living with a man under his name. Russell."

Then Mr. Hess drew out a confession that she was arrested three minths ago for soliciting and sentenced to twenty days on the Island by Justice Hogan.

Calls This a Good Life. and you served your time like a

"And you served your time like a little lady?"

"Yes, sir, I did; but since July, when I took up with Russell, I have been a good girl," said the witness.

Mrs. Thorne-Russell said she was the daughter of respectable parents in Paterson, N. J., till she ran away from home, came to New York and entered Mrs. Sanford's house.

"The front of the house in Bayard street was an onlie in the house to attract attention," said the witness. "When I first entered it there was plano playing, but they stopped that."

The witness said that Capt, Devery raided the house twice and Capt. Cross once while she lived there. Mrs. Sanford was very bitter toward Capt Cross, the witness said. She said the plano player was an old man, and they called him "Change," because he knew how to play only one tune.

Annie Rooney was called as the next witness. Annie proved to be a little woman, with a puffy white face and a creaking voice. She had known Mrs. Sanford when she managed a place in Wooster street, and became an inmate of 28 Bayard street in July 1892. There was plano-playing three nights a week, and the house ran openly, she said.

The plano playing was not stopped till long after the change of captains from Devery to Cross. There were elevered in the house.

"Tve been known by the name of Anager and the pose."

"I've been known by the name of Anmic Rooney ever since the song was
written," said the witness, with a most
melancholy face and voice, and she
seemed surprised when the audience
laughed. She saw no humor in it at
all. She said to Mr. Hess that her real
name was Maggie Smith, she was
twenty-five years old and had lived a
dissolute life six years.

"I live at the Pacific Hotel, 33 Bowery,
now," said the witness.

"I live at the Pacific Hotel, 33 Bowery, now." said the witness.
"Can you take your gentlemen friends to the Pacific Hotel?" Mr. Hess asked.
"Not if your seen," said the witness, and again she didn't understand why the audience laughed.
Annie said that by Mrs. Sanford's orders the girls had to keep quiet, the doors were kept locked, the girls were not alolwed to go to the door, and strangers were not admitted, all in contradiction of the Widow Sanford Stopped a Captain

When sworn again in the case of Capt.
Devery and Policeman Gennon Annie
testified that in 1893 she solicited the
Captain on the street, not knowing him.
He accompanied her to the house, and
had a talk with Mrs. Sanford. It was not
till she got her "pick up" to the house,
that she carned hat he was the Captain
in cilizen's dress.

Mr. Hess returning to the cross-examination in behalf of Capt. Cross, got the
witness to say that "Billy" Hoyt, of

"It was a couple of months after I ntered the house that Mrs. Sanford ent four of the girls up to Williams-ridge after the raid, but I didn't go, went somewhere elese. We were all way till Oct. 20."

Annie remembered when Rhoda San-ord was sick of typhold fever, much to fir. Hess's joy, but she said her mistress ras ill only a week, and Mr. Hess ropped it.

Up to this point Inspector McLaugh-lin's name had not been dragged into this story, but Mr. House prodded Citt-en Kilpatrick as to how conscientiously he performed his duty as a law-loving citizen.

citizen.

Mr. Kilpatrick admitted that he did not lay this story of attempted extortion before the District-Attorney, nor appeal to any Police Magistrate to have Burns

fore the District Attorney, nor appeal to any Police Magistrate to have Burns punished.

"But," added Kilpatrick after an impressive pause, "I did go to the station and inform the Captain of the matter."

Mr. House tried unsuccessfully to make it appear that Burns was acting within the law, as Kilpatrick had no specific bridge building permit, or that possibly Burns's 1250 really represented the expense of building the bridges.

The detectives of the New York Police Department are noted as among the best dressed men in the city, and, possibly, this is one of the reasons why every patrolman is ambilious to be a ward man precinct detective. This is responsible, perhaps, for the general laugh from the duecoat spectators when in response to Mr. House's question: "How was Burns dressed on that first visit?" Builder Kilpatrick repiled, with peculiar gusto: "Bi-le-gantly!"

President Martin said he was anxhous to hear whether Mr. Kilpatrick had reported Burns's attempt at extortion to the Police Department. the theory of a plot for wholesale desiruction of property and probably of life.

The machines are electrical devices. The cells are in the ends, and wires run the length of the tubing, which is something over an ich i diameter.

The cut is broken near the centre in such a manner as to cause a spark so that naphtha, benzine or any other highly inflammable fluid, conveniently placed would instantly ignite and cause fire.

The deadly nature of the machines is seen when it is known that the time of the explosion can be regulated with absolute certainty by the proper adjustment of the clockwork mechanism which frees the current.

The police believe that somewhere, hidden in the haunts of the Chicago Anarchists, is to be found still more incriminating evidence of a gigantic incendiary conspiracy, and also further proof of the premeditated uprising which was planned by the Reds for this Fail or Winter.

The congregation unanimously adopted resolutions by a rising vote stating the belief that the charges had been brought by an irresponsible adventurer, evidently for the purpose of blackmail; that the official board, at the request of Dr. Hurst, had some months ago investigated these accusations and had found them to be entirely without foundation.

The members of the church expressed unswerving confidence in Dr. Hurst's innocence of the charges.

Great Textile Strike Is On in New Bedford.

Mills Silent and Operators Fill the

NEW BEDFORD, Mass., Aug. 20.-The great textile strike, which bids fair

history of New England, is on. Some fifteen of the non-union weavers who deserted the strikers during the recent Wamsutta strike are at work in work in the Southend. With these exceptions, every mill in the city is silent and the streets are full of operatives who seem to be well behaved and cheer-

ratious unions were neid this forenous and encouraging reports are made.

The Howland officials and Secretary Ross, of the spinners union, are to have a conference to-day, and it is hoped that an understanding will be reached. This mill has always been noted for its good treatment of the help and its Treasurer, William D. Howland its balland to be anytous for a settlement. Even if this mill should settle with its employees, it is thought the other mills will hold out longer. Among the business men of the city, however, there is a general belief that a settlement of the whole trouble will be made within a week.

Justice Beach, of the Supreme Court, to-day handed down a decision in the case of John Patterson & Co. and several other merchant tailors against John Stewart and the members of the Journeymen Tailors' Benevolent and Protective Union.

Justice Beach continues the injunction granted by Judge Dugro, of the Superior Court, in so far as it restrains the members of the union from congregating near the plaintiffs' places of business, or from interfering with or threatening the men who took their places, as the latter go to or from their work.

The three policemen, including Connolly, had ben drinking beer for some time in his sister's rooms. My mother was not present, and she was dragged into this merely out of spite."

Jane Connolly had no marks on her face, although she said Matthews struck her in the eye, while Matthews is black and blue about the left shoulder, where he said the policeman clubbed him,

A HORSE'S MEMORY.

Years of Separation. H. Richardson; of Westfield, Mass. tells the following pleasant story in Ou Dumb Animals:

Dumb Animals:

Walking from the armory in Springfield down street one day, giving no heed to the passing carriages in the street, he suddenly heard a horse whinny. He looked in the direction of the sound, and recognized a horse he formerly owned. He waved his hand for the driver to stop. The man in the buggy did so, and Mr. R. stepped from the sidewalk into the street, and laying his hand on the horse said to the gentleman:

"Excuse me for stopping you, sir, but I wanted to speak of your horse, which attracted me.

At the sound of his voice the horse turned his head over his shoulder and softly whinnied again, as a horse will often do when one goes into the stall beside him to give feed. Mr. R. softly patted the creature, and the driver remarked:

"He is a fine animal"

beside him to give feed. Mr. R. softly patted the creature, and the driver remarked:

"He is a fine animal."

"So I see," repiled Mr. R.; "how long have you owned him?"

"Two or three years; bought him of a Westfield man whose name I don't remember. Had nim out on the race course in Chicago last year."

Mr. R. stepped out in front of the animal, whose bright eyes and nodding head evinced his pleasure, and said:

"How do you do, Prince?"

The horse immediately put his right foot into the outstretched paim of his old friend, whom he had not seen for more than two years.

"I did not know that he had any tricks like that," said the owner. "When did you know the horse?"

"I sold him for 1400 to a man who came into my yard to see him—quick trade."

"And I was offered \$2,000 for him in Chicago last year," laughed the man in the bugsy.

"Kiss your old master if you love him," said Mr. R., and the horse pulled on the checked rein and buried his lips in the full beard of his old friend.

"A fine old fellow," said Mr. R., "and I should not have seen him if he had not called me."

He patted the horse an affectionate good-by, bowed, and the man in the bug-gy drove on, while he resumed the side-walk full of tender memory of an animal he had loved and lost.

THE MANUFACTURE OF WIRE. New Stores, 43 to 47 West 23d St; Same System Employed in Making All Kinds.

of steel require five or six annealings while being reduced to the finer gauges of wire.

But the manufacture of soft steel, and the details of rolling it into rods, have been so perfected that soft steel rods can now be drawn into fence wire without any cleaning or annealing. After the final drawing the wire is finished in various ways, depending upon the purposes for which it is intended.

No matter of what metal the wire may be composed, the same general system of drawing is used, varying hore or less according to the metal. Including gold, sliver, platinum, copper, &c., the commercial sizes of wire run from 14-inch to 1-700-inch in diameter.
